### Asphalt Paving Mix

#### Safety Data Sheet

**OSHA HCS (29 CFR 1910.1200)**

---

### Section 1: Product and Company Identification

<table>
<thead>
<tr>
<th>Product Identifier</th>
<th>Base Asphalt Pavement Mix</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chemical Name</td>
<td>Mixture</td>
</tr>
<tr>
<td>CAS No.</td>
<td>Petroleum Asphalt / Road Paving Asphalt / Hot Mix Asphalt / Blacktop / Bitumen / Warm Mix Asphalt</td>
</tr>
<tr>
<td>Trade Name(s)</td>
<td></td>
</tr>
</tbody>
</table>

**Relevant identified uses of the substance or mixture and uses advised against**

- **Identified Use(s):** Road Paving Asphalt
- **Uses Advised Against:** None.

**Details of the supplier of the safety data sheet**

- **Company Identification:** Gallagher Materials
  
  18100 S Indiana Avenue
  
  Thornton, IL 60476

- **Telephone:** 708-877-7160

**Emergency telephone number**

- **Emergency Phone No.:** Not classified as dangerous for supply/use. Please contact the supplier above during normal business hours.

---

### Section 2: Hazards Identification

**Classification of the substance or mixture**

- **OSHA HCS (29 CFR 1910.1200) / GHS Classification:** Not classified as dangerous for supply/use.

**Label elements**

- **Hazard Symbol:** None
- **Signal Word(s):** None
- **Hazard Statement(s):** None
- **Precautionary Statement(s):** None

**Other hazards**

- Contact with hot ASPHALT PAVING MATERIALS causes skin burns. May cause eye irritation.
- Fumes may cause upper respiratory irritation (nose & throat).
- Skin contact may increase susceptibility to sunburn.
- Poisonous hydrogen sulfide gas can accumulate in the head-space of containers of certain asphalt products.
- Mechanical disruption (e.g., milling, cutting, chipping) of cured asphalt pavement may release crystalline silica dust from the aggregate.

**Additional Information**

- Avoid breathing dust/fume/gas/mist/vapors/spray.
- As necessary, Wear protective gloves/protective clothing/eye protection/face protection.
- Wash hands and exposed skin after use.

---

Revision: 9 July 2015
ASPHALT PAVEMENT MIX

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

*Contains: <0.05% of 3 - 7 ring Polycyclic Aromatic Hydrocarbons (PAHs).

Other Substances in the product which may present a health or environmental hazard, or which have been assigned occupational exposure limits, are detailed below. Please see Section 8 of SDS for more details.

- Contains: <0.1% airborne crystalline silica (inherent in aggregate) and <0.1% hydrogen sulfide.
- Hydrogen sulfide gas can accumulate in the head space of containers of certain asphalt products.
- Heated product releases asphalt fume.

Additional Information - None

SECTION 4: FIRST AID MEASURES

Description of first aid measures

Inhalation: Not normally required. Move person to fresh air. If necessary, obtain medical attention.

Skin Contact: Causes burns. Immediately cool skin where asphalt binder has adhered to skin. Allow asphalt binder which remains on the skin to fall off naturally. DO NOT REMOVE. If problem persists, get medical attention.

Eye Contact: Flush eyes with water for at least 15 minutes while holding eyelids open. Remove contact lenses, if present and easy to do. Continue rinsing. If irritation develops and persists, get medical attention.

Ingestion: Not normally required. Do not induce vomiting. Do not give anything by mouth to an unconscious person. Get medical advice/attention if you feel unwell.

Most important symptoms and effects, both acute and delayed: None known

Indication of any immediate medical attention and special treatment needed: None known
SECTION 5: FIRE-FIGHTING MEASURES

Extinguishing Media
- Suitable Extinguishing Media
  Extinguish with carbon dioxide, dry chemical, foam or water spray.
- Unsuitable Extinguishing Media
  None anticipated.

Special hazards arising from the substance or mixture
Combustion causes toxic fumes. Combustion products: Carbon monoxide, Carbon dioxide, Nitrogen oxides, Sulfur oxides

Advice for fire-fighters
A self-contained breathing apparatus and suitable protective clothing should be worn in fire conditions.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures
Avoid contact with skin and eyes.

Environmental precautions
Not normally required.

Methods and material for containment and cleaning up
Allow product to cool/solidify and pick up as a solid.

Reference to other sections
None

Additional Information
None.

SECTION 7: HANDLING AND STORAGE

Precautions for safe handling
Avoid contact with skin and eyes.

Conditions for safe storage, including any incompatibilities
- Storage temperature
  Store at temperatures not exceeding the product’s flash point.
- Incompatible materials
  Strong oxidizing agents.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Control parameters

Occupational Exposure Limits

</table>

* Inhalable benzene-soluble fraction; ^Suspected Human Carcinogen; *Refer to OSHA 29 CFR 1910.1000 & 29 CFR 1926.55;

Recommended monitoring method
NIOSH 5042 (Asphalt Fume), NIOSH 7500 (Crystalline Silica), Electrochemical sensor (hydrogen sulfide).

Exposure controls
Use only outdoors or in a well-ventilated area.

Appropriate engineering controls

Personal protection equipment
Eye/face protection
The following to be used as necessary: Safety Glasses

Revision: 9 July 2015
ASPHALT PAVEMENT MIX

Skin protection (Hand protection/ Other)
The following to be used as necessary: Leather or thick textile gloves.

Respiratory protection
In case of inadequate ventilation wear respiratory protection. Use NIOSH approved respiratory protection. Air-purifying respirator with combination organic vapor cartridge / particulate filter may be sufficient. Check with protective equipment manufacturer's data.

Thermal hazards
Use gloves with insulation for thermal protection, when needed.

Environmental Exposure Controls
Do not discharge waste and/or cleaning water via public sewer system. Ensure waste is collected and contained.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

SECTION 10: STABILITY AND REACTIVITY

Reactivity
Stable under normal conditions.

Chemical stability
Stable.

Possibility of hazardous reactions
May react violently with: Strong oxidizing agents

Conditions to avoid
Incompatible materials
Oxidizers

Incompatible materials

Hazardous decomposition product(s)
Combustion causes toxic fumes. Combustion products: Carbon monoxide, Carbon dioxide, Nitrogen oxides, Sulfur oxides

SECTION 11: TOXICOLOGICAL INFORMATION

Exposure routes: Inhalation, Skin Contact, Eye Contact
ASPHALT PAVEMENT MIX

Information on toxicological effects

Acute toxicity
LD50 (rat): >5000 mg/kg bw
LD50 (dermal): >2000 mg/kg bw
LC50 (inhalation, fume): >94.4 mg/m³

Irritation/Corrosivity
May cause irritation to skin, eyes and respiratory system.

Sensitization
Not to be expected

Repeated dose toxicity
NOAEL (rat): 28 mg/m³
LOAEL (rat): 149 mg/m³

Carcinogenicity
Not to be expected at typical road paving temperatures.

<table>

<td>No.</td>
<td>Yes.*</td>
<td>No.</td>
<td>No.</td>
</tr>
</tbody>
</table>

Mutagenicity
Not to be expected.

Reproductive toxicity
Not to be expected.

* IARC (2013, volume 103) identifies that “occupational exposures to straight-run bitumens and their emissions during road paving are possibly carcinogenic to humans (Group 2B).” However, classification as a carcinogen under OSHA 29 CFR 1910.1200 is not warranted given the absence of positive cancer findings in human epidemiological studies and in cancer studies with laboratory animals when exposed dermally or by inhalation to asphalt products or fume condensates that are typical of road paving applications. IARC (2013, volume 103) also identifies that “occupational exposures to oxidized bitumens and their emissions during roofing are probably carcinogenic to humans (Group 2A).” Roofing shingles, which are considered an article under OSHA 29 CFR 1910.1200, are sometimes recycled into road paving asphalt mix. Emissions from oxidized bitumen, e.g., from shingles, at road paving temperatures are not expected to be qualitatively different than emissions from straight-run bitumens, and therefore would not warrant a carcinogen classification under OSHA 29 CFR 1910.1200.

Ecotoxicity

Short term
LL50 (48 hour): >1000 mg/l (Fish)
LL50 (48 hour): >1000 mg/L (Aquatic Invertebrates)
EL50 (48 hour): >1000 mg/L (Aquatic Plants)

Long Term
No data

Persistence and degradability
The product is poorly biodegradable.

Bioaccumulative potential
The product has low potential for bioaccumulation.

Mobility in soil
The product has low mobility in soil.

Results of PBT and vPvB assessment
Not classified as PBT or vPvB.

Other adverse effects
None known.

SECTION 13: DISPOSAL CONSIDERATIONS

Waste treatment methods
Disposal should be in accordance with local, state or national legislation. Consult an accredited waste disposal contractor or the local authority for advice.

Additional Information
None known.

SECTION 14: TRANSPORT INFORMATION

Ground or Water Domestic Voyage (DOT):
Not regulated when transported below 240°C (464 °F).

Revision: 9 July 2015
SECTION 15: REGULATORY INFORMATION

Safety, health and environmental regulations/legislation specific for the substance or mixture:

TSCA (Toxic Substance Control Act) - Inventory Status: All components listed or polymer exempt.

RCRA Hazardous Waste Number (40 CFR 261.33): None

US RCRA Hazard Class: Not applicable.

Designated Hazardous Substances and Reportable Quantities (40 CFR 302.4):
